# SMT Product Summary

SMT's sensor data collection and processing pipeline consists of:

A3 Data Logger

Data loggers that communicate wired or wirelessly to a gateway device in the building.
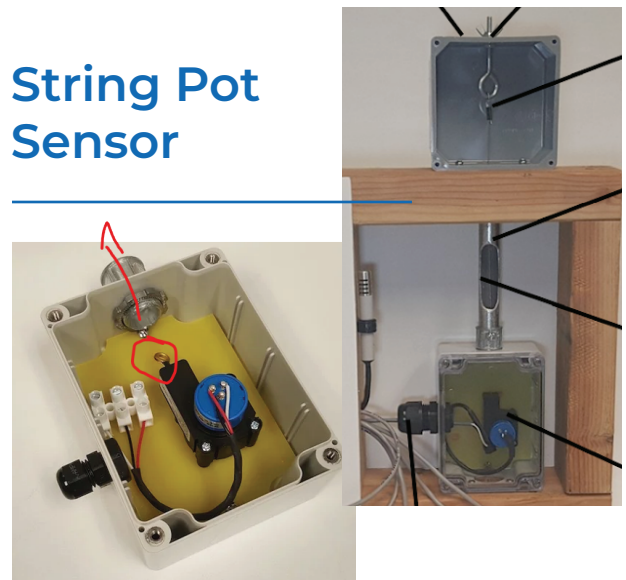

Point Moisture Measurement

Point Moisture Measurement Sensor (PMM) is used for moisture content measurement of timber.

Moisture Detection Tape

Moisture Detection Sensor (MDS) Tape is used for the detection of physical moisture within an assembly

String Pot Sensor

String Pot is a sensor for vertical, horizotal and/or diagonal displacement monitoring

And other 3rd party sensors are available
